EXPERIENCE

Nexient
Software Developer II, November 2021 - Present
Software Developer I, November 2020 - November 2021

- Developed 2 separate applications at The Home Depot to help with compliance for the California Consumer Privacy Act, focusing specifically on React and AngularJS
- Improved visualization during the wildfire season to approximately 16 million people in California while on contract for PG&E
- Designed and developed interfaces to help deliver API data in a viewable format for 3 different clients
- Coached and mentored 3 new developers as they joined the company while on contract for First Republic Bank
- Delivered quality code within 2 week sprints, meeting the Definition of Done requirements

Informa
Sales Operations Specialist, March 2020 - November 2020
Client Success Manager, June 2017 - March 2020

- Worked in a hybrid role from May 2017 - March 2020 supporting the Sales team at Wards Auto
- Helped to step in and manage marketing tasks as needed, including 6 months of email marketing support on Eloqua and 6 months of social media support
- Minimized the amount of time required to complete renewals, helping to improve overall renewal rate by approximately 15% year-over-year
- Supported clients and colleagues alike through tutorials and website support of Wards products
- Monitored sales orders and opportunities for compliance from March 2020 - November 2020
